## **To Our Valued Customers**

From time to time we receive questions on the Genetically-modified-organism (GMO) status of our fresh produce ingredients. This memo is designed to address this question.

For Products: Value-added and commodity lettuces, kale, broccoli, green onions, cilantro, cauliflower, carrots, baby and tender leaf (spring mix-type items).

At this time our growers do not cultivate genetically modified fresh produce items in any of our agricultural operations. Furthermore we are not actively seeking or using GMO product in the commodity fresh-cut products we ship to you. In the event that we find it necessary to modify this policy we will notify you of the change before the first shipment of genetically modified cultivars.

If you have any additional questions, please feel free to contact us directly.

Sincerely,

Francis Adenuga
