**JOB DESCRIPTION:**

Under general supervision, this position performs a variety of skilled repair and construction tasks in a combination of several trades, requiring less than journeyman skills in any one of the specialty trades practiced. You will perform these tasks alone, with co-worker assistance, and/or while directly supervising an inmate work crew. Routine and emergency work orders and the preventative maintenance checks and services program generate the tasks to be performed. Tasks are approved and priorities set by the supervisor. The normal duties performed by this position include: carpentry and refinishing work; new construction and remodeling of facilities to include demolition and clean-up; interior and exterior painting and supervision of the inmate painting crew; landscaping, yard maintenance, and snow removal with heavy equipment; repair and cleaning out of plugged sewer lines, sinks, toilets and showers; replacement of electrical switches and outlets; physical inventory of tools, equipment and supplies; basic welding using gas and arc welding; use of cutting equipment; maintaining and completing supply, work, and maintenance records; assisting with the maintenance and repair of complicated heating, air conditioning and ventilation (HVAC) systems; maintaining automotive vehicles, generators and motorized equipment; occasional operation of heavy equipment (road grader, scoop loader, tractor); working on asbestos abatement projects as required;

performing work in confined spaces as required; assisting other maintenance section co-workers as needed in a variety of tasks and performing other duties as assigned. This position supports the entire Wildwood Correctional Complex and will be called upon to perform duties anywhere within the complex. You are directly accountable for the quality and quantity of the work you and the inmate crew accomplish. You insure all security procedures are followed before, during and after all work is performed.

Special Considerations for this job: This position is located in a prison and requires daily contact with inmates and supervision of inmate workers. The facility houses prisoners classified as medium/minimum security risks. This adds the additional responsibility of performing security tasks in addition to the maintenance duties assigned. Work must be accomplished within a highly structured environment, which includes limitations on when and where work may be performed. The individual selected for this position must pass an extensive criminal background investigation before hire.

#### SPECIAL REQUIREMENTS

Performs the work of a maintenance generalist at the journey level, regularly using the skills and certifications required of a tradesman at this skill level. Minimum of 4 years experience. Requires a broad knowledge of intermediate level general maintenance duties as listed above. Uses and must be familiar with uniform building codes, OSHA safety standards, and Department of Corrections regulations. Able to interpret blueprints and plans and to plan and lay out work. Must be physically fit and able to wear a respirator and emergency response equipment (self-contained breathing apparatus). You must be able and willing to participate in asbestos abatement projects after receiving training.

A valid Alaska drivers license.

A valid Alaska commercial drivers license, Class A or B; or the ability to obtain same within six months of hire.

Asbestos abatement certificate; or the ability to obtain same within six months of hire.
