DOOR PULL HANDLE

Why a “white” Door Pull Handle...
Some of our competitors like to use black as their primary color so they can use recycled resins (this will increase their profits). Door pull handles are produced from virgin resin without any colorant. This ensures optimum performance properties, minimizing potential safety issues.

Door Pull Handle passes 500 lb. pull test...
Our Door Pull Handle passes 500 lb. pull testing without any tearing or breaking. However, CAUTION... at 500 lbs. the screws actually pull out of the door jam. We recommend use of this product on total door weights of 250 lbs. or less to ensure safe use of product.

Door Pull Handle comes with Pre- Installed Screws...
U.S. patented Door Pull Handle incorporates lean manufacturing by streamlining the manufacturing process, helps shop cleanliness, and improves safety (no screws on the floor). Handles can be installed in 20 seconds or less ! * Handles are also available without screws installed if needed.

DOOR SHIMS

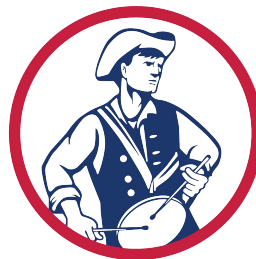

- We are extremely excited about this new patent pending product which creates added value for Door Hanger customers.
- Two (2) piece Door Shim ships as one (1) piece. Simply break shims apart, attach the two (2) shims together as designed for function, and slide up or down for desired gap.
- Door Shim can be sold as part of a hardware kit or attached to the pre-hung door for shipping. When attached to the pre-hung door, shim can actually protect hinge screws during shipping.
