STORAGE & HANDLING:

- **Warning!** If you scrape, sand, or remove old paint, you may release lead dust. Lead is toxic. Exposure to lead dust can cause serious illness, such as brain damage. Especially in children. Pregnant women should also avoid exposure. Wear an NIOSH-approved respirator to control lead exposure.

- To avoid breathing vapors and spray mist, open windows and doors or use other means to ensure fresh air entry during application and drying.

- If you experience eye watering, headaches or dizziness, increase fresh air.

- A dust mask does not provide protection against vapors.

- Use only with adequate ventilation.

- Wash thoroughly after handling.

- Clean up carefully with a HEPA vacuum and a wet mop.

- KEEP AWAY FROM CHILDREN.

- KEEP FROM FREEZING

  - **FIRST AID:** In case of skin contact, wash thoroughly with soap and water. If any product remains, gently rub petroleum jelly, vegetable or mineral/baby oil onto skin, then wash again with soap and water. Repeated applications may be needed. Remove contaminated clothing. For eye contact, flush immediately with large amounts of water, for at least 15 minutes. If swallowed, get medical attention immediately. If inhalation causes physical discomfort, move to fresh air. If discomfort persists or any breathing difficulty occurs, get medical help.

MIXING

• Requires the addition of a colored paint to complete the chemical properties of Gorilla Grip.
• We recommend using Anvil Acrylic Concrete Floor & Driveway Water reducible Acrylic Coating #1500.
• Also acceptable are topline exterior gloss/semi-gloss enamels, industrial acrylic enamels or acrylic floor enamels.
• Simply mix 1 quart of enamel to the 10-pound pail, or 1 gallon of enamel to the 40-pound pail using a mechanical mixer or shaker.
• The color of paint will determine the color of Gorilla Grip.
• DO NOT USE INTERIOR OR FLAT EXTERIOR PAINTS.

APPLICATION:

• Do not dilute,
• Do not apply if the threat of rain is imminent or if the air/surface temperature is expected to be below 50º F within the first 24 hours of application.
• Apply by roller, brush, texture pump, squeegee or trowel.
• Use a synthetic roller with a short nap (3/16” or shorter) that is designed for the application of adhesives, contact cements, or mastics.
• Two liberal coats are recommended depending on the surface being coated.
• To achieve a uniform textured surface.
• A properly prepared porous surface will allow a film build of 10 MIL wet film thickness, per coat and the desired surface texture.
• For increased cleanability, and chemical/solvent resistance, top coat with Anvil Acrylic Concrete Floor & Driveway Coating #1500.

CLEANUP:

• Warm water - mild detergent.
