

Space and the Network Symposium – A Series of Intimate Fireside Chats

Overview

The military Space domain is at an extremely critical point; its vital role in the National Defense Strategy has never been greater. The Greater Los Angeles Chapter of AUSA is pleased to be hosting its annual Space and the Network Symposium as a series of fireside chats. In adapting to the challenges of a global pandemic, we sought a way to safely continue our symposium's history of providing an intimate venue for close interaction between Government, Industry and Academia. We believe that by stretching out our sessions as a series of bi-weekly "fireside chats" we can avoid on-line fatigue and encourage audience participation. Our participants will look forward to the same lively dialogs that have been a hallmark of the GLAC AUSA symposium for more than a decade. We will limit our registration, as always, to ensure that interchange is possible.

Agenda

COMPLETED!

Welcome & Introductions

GLAC AUSA

Introduction of Fireside Chat

LTG Richard Formica (Confirmed)
United States Army Retired
Vice President
CALIBRE Systems

Army Space Capabilities in Support of Multi-Domain Operations, a fireside chat

Commander, Space and Missile Systems Center
Los Angeles Air Force Base, California
United States Air Force

NOTE: All participants / speakers / times are subject to change.

Introduction of Fireside Chat

Randy Villahermosa
The Aerospace Corporation

A fireside chat on space technology Innovation. *There have been more changes to US Government space programs in the past 2 years than in the previous 50. The stand-up of the US Space Force, the establishment of the Space Development Agency and the new US Space Command come as space becomes an increasingly competitive environment. Together, these changes create a unique historical opportunity to reimagine government space and the role of technology innovation for the next decades of the 21st century.*

Leader:

Lt. Gen. John F. Thompson (Confirmed)
Commander, Space and Missile Systems Center
Los Angeles Air Force Base, California
United States Air Force

Moderator:

Randy Villahermosa
iLAB General Manager
