Curved Flashing
For Roof & Wall Panel Systems

Curved Flashing

For Roof & Wall Panel Systems

Applications

Convex / Concave Lateral / Longitudinal Multi-Stepped
Curved Gable, Sidewall, Cornice & Coping

Compatible Panel Systems

ZIP-RIB - ZIP-LOK - BD-1520 - 306 "Traditional Rib"

Standard Materials

Available in same material as panel system

Architects that specify *Factory Formed Curved Flashings* know that the results look dramatically more impressive.

The **Merchant & Evans** curved flashing system is custom made to match the curved roofing. However, when unspecified, less attractive straight flashings are fabricated and installed.

Unspecified

When curved flashings are not specified, straight lengths are cut in segments to suit the radius; creating jagged edges and more joints.

Specified

SPECIFY

Factory Formed Curved Flashings
for the gable ends & sidewalls on
your next curved roof design.
