### About Engage Behavioral Health and ABA Therapy

As the leading provider of Applied Behavioral Analysis (ABA) Therapy, our clinical directors and therapists are dedicated to developing an individualized ABA therapy program tailored to each unique child and his or her needs, which allows them to learn in their natural environments.

At Engage Behavioral Health, our ABA Therapy includes individual behavior plans, verbal behavior programs, social skills groups, self-care skills, behavioral babysitting, academic tutoring, community relationships and caregiver/professional workshops. What a child will learn can range from better daily speech and conversation to learning how to accomplish household chores to even becoming a better student at school.

Our team understands that raising a child with Autism Spectrum Disorder or other special needs takes a combination of resilience, support and resources. At Engage Behavioral Health, we consider ourselves a partner in a child's journey to life-changing development and growth. In addition to our autism behavioral services, we also offer educational training to help families every step of the way to helping a child become a well-rounded adult.

Because at Engage Behavioral Health, we are passionate professionals who actively strive to create lasting change.

### Quick Quote

"Ever since I was 12 and my nephew was diagnosed with a developmental disability, I knew that I wanted to run a clinic for autistic children — I even designed the floor plans for it! ... Today, Engage Behavioral Health provides services to families in homes and within our ABA centers throughout Tampa Bay and beyond. The biggest achievement is not the growth of my business, but the countless children and families we have had the opportunity to help."
