

Rubberway® Multi-Purpose Rubber Paving Solutions

Rubberway Multi-Purpose systems are constructed of a synthetic rubber granulate that is pigmented in twenty four color options, and when combined with a high quality polymer, creates a functional, versatile surface for many applications.

These surfaces are created to be customizable, therefore allowing unconventional variations like designs, shapes, tapered edges, rapid drainage, or submergence under water to be feasible.

Benefits

Colorful and Attractive

Smooth and Seamless

Varying Thicknesses

UV Stabilized

Porous or Non-Porous

Resilient, Yet Firm Structure

Skid Resistant, Good Traction

Versatile Design Options

Provides Solar Reflectance

Chlorine Compatible

Quick Drying

Sound Dampening

Reduces Liability Risks

Easy to Install & Maintain

Applications

- Rooftops
- Decks
- Patios
- Garages
- Courtyards
- Cart Paths
- Green Buildings
- Training Tracks
- Fitness Centers
- Pools & Water Parks
- Theme Parks
- Recreation Parks

Color Selection

Multi-Purpose colors can be combined into blends to add dimension and style to your surface. A clear, UV stabilized binding agent is recommended to preserve color fastness.
