

BURGESS

The Top Construction Defects of 2020 and How to Avoid Them

Presented by: Burgess Construction Consultants, Inc. | Booth #1007 & 1009

Would you like to know what the most recurring defects in construction were for 2020, how often they occurred, where they occurred most frequently and, more importantly, how to avoid them going forward? This data-rich session will dive into these details plus expound on the people and/or processes responsible, outline proactive measures for process improvement, and explore the time and money savings that can be realized in short order. Knowledge is power so plan on leaving this session feeling more equipped and in control than before.
