COVID-19 Healthcare Procedures & Hospitals

Protecting Against COVID-19

Because Ohioans have stayed home and practiced social distancing, we have slowed the spread of the virus and flattened the curve.

On April 27, 2020 Governor DeWine announced the next steps for restarting Ohio’s healthcare system to include the restarting of healthcare procedures and reopening of hospitals and outpatient facilities, dentist offices, and veterinary clinics. On March 17, Ohio Department of Health (ODH) Director Amy Acton, M.D., MPH, issued an order for the postponement of non-essential medical procedures. On May 1, a new order will take effect to include the following to ensure that Ohioans are getting their healthcare needs met:

1. All healthcare procedures that do not require an overnight stay in a hospital may move forward.
   a. This includes regular doctor visits, well-care checks, well-baby visits, outpatient surgeries, diagnostic testing and imaging, dental procedures, and veterinary visits.
   b. Anything that requires hands-on care in a doctor, dentist, or veterinary office that does not require an overnight stay, may move forward.
   c. Telehealth services should continue to be utilized if possible.
   d. Prioritization should be given to those who have delayed needed procedures or those with new diagnoses.

2. Procedures that were allowed in the March 17 order will continue.
   a. A threat to the patient’s life if the surgery or procedure is delayed.
   b. A threat of permanent dysfunction of an extremity or organ system if delayed.
   c. The risk of metastasis or progression if staging is delayed.
   d. The presence of severe symptoms causing an inability to perform activities of daily living.
   e. The risk of rapidly worsening symptoms if delayed.
