Auto Detailing Packages

2hr Express Detail

Vehicles wheels, wheel wells, tires, trim and front fascia are first pre soaked, scrubbed and rinsed to loosen and remove dirt, grime, grease and bug splatter residue. Door jams are thoroughly cleaned and dried. The Exterior is then washed, dried and a spray sealant applied leaving a high gloss and hydrophobic finish on your vehicles paintwork.

Your auto interior is first air purged and vacuumed to remove dust and dirt and other debris from your cars interior including floor boards and hard to access cracks and crevices. Leather and vinyl parts along with trim are treated and detailed so they look like new and dash board, door panel, consoles, and pockets are also given special attention. Windows are cleaned inside and out.

Summary

Exterior:

Facia Pretreated for bug residue
Door jams degreased and cleaned
Hand wash
Wheel wells cleaned and dressed
Tires and wheels cleaned and dressed
30-Day Spray Sealant applied

Premium Detail Package

This is a package was designed for vehicles that do not need a lot of work to the exterior, but the interior of the vehicle needs extra attention.

The exterior is washed to remove any dirt before a one step polish is performed to the paintwork to remove minor swirls and minor scratches then a 3 month carnauba wax is applied to provide paint protection and gloss to the vehicle.

The interior of the vehicle will get our Complete Interior

service. Your auto interior is first air purged and vacuumed to remove dust, dirt and other debris from your vehicles interior including floor boards and hard to access cracks and crevices. Leather and vinyl parts along with trim are treated and detailed to look like new. The dash board, door panels, consoles and pockets are given special attention. We spot treat interior upholstery and carpet in order to shampoo them by hand, then deep clean with a heated extractor to remove the stale odors, grime and ground-in dirt. We also clean all exterior and interior mirrors, windows and gauges.

Summary

Exterior:

Facia Pretreated for bug residue
Door jams degreased and cleaned

Platinum Detail Package

This is a package was designed for vehicles that need a lot of work to the exterior and the interior of the vehicle needs extra attention. Also great for vehicles being prepped for sale in order to command a higher trade in/sale price.

The exterior is washed to remove any dirt before the surface is treated with Iron X to release embedded iron particles and neutralize caustic compounds. A clay bar process follows to remove embedded contaminants that cause the paint to feel rough when you run your hands across the surface of the car. After this, a 2 step compounding and polish is performed to the paintwork to remove medium-major swirls and scratches then a 3 month carnauba wax is applied to provide paint protec-

tion and gloss to the vehicle. (70%-80% paint correction.)

The interior of the vehicle will get our Whole Interior service. Your auto interior is first air purged and vacuumed to remove dust, dirt and other debris from your vehicles interior including floor boards and hard to access cracks and crevices. Leather and vinyl parts along with trim are treated and detailed to look like new. The dash board, door panels, consoles and pockets are given special attention. We spot treat interior upholstery and carpet in order to shampoo them by hand, then deep clean with a heated extractor to remove the stale odors, grime and ground-in dirt. We also clean all exterior and interior mirrors, windows and gauges.

Engine

Engine compartment is shampooed with special degreasers & cleaners to break down caked up grease and grime that has deposited on firewalls, liquid containers and valve covers. Engine compartment is then "dressed" with a non silicone low sheen dressing. Although many precautions are taken not to damage electronic sensors we are not responsible for damage that could occur.

Sedans \$290 / Mobile Service \$310.00
(6hrs)

Minivans, Trucks and SUV's
\$340 / Mobile Service \$360
(7 hrs)

*For vehicles with dog hair or excessively dirty interiors add +1hr to the service time.

*If the Check engine light is on, we unfortunately cannot shampoo the engine.

*Please call for estimate on oversized vehicles.

Additional Services

Headlight Reconditioning

\$70/pair

Most vehicle headlights are covered with a protective, transparent, plastic lens that becomes opaque and cloudy and can severely restrict the amount of light reaching the road. This clouding is caused by accumulated exposure to ultraviolet light however replacing your headlights can be very expensive. By getting your headlights reconditioned they will be returned to like new condition for a much lower price.

Fabric and Leather Protection/Coat

\$60

The fabric protector creates a strong coating, which protects fabrics not only against dirt, but most of all UV rays. It helps to prevent textiles from fading and losing its original color tone, which may occur due to long-term exposure of UV rays in direct sunlight or strong chemicals. Also helps to maintain all textiles in your car in perfect shape. It has strong hydrophobic properties, that ensure ease of dirt removal. Protected textiles don't absorb as much dirt as bare ones. Even in case of fabric convertible tops.

The Leather Coating ensures a high level of protection as the coating itself is hydrophobic and repels both liquids and dirt. It also provides strong protection against UV rays, allowing to keep for a long time the freshness of colors even in hot and sunny climates. The Leather coating is designed to protect leather trim for a maximal possible time by preventing it from dirt, sweat, salt and fats. Its hydrophobic properties and strong bonding to the surface help to protect against pollutants that may penetrate structure of your trim. Also provides protection against any discoloration resulting upon contact with leather belts, jackets or jeans trousers.

Before application, it is highly recommended to have the interior cleaned using either our 2 hr Express Detail or Whole Interior Service

Engine Shampooing

\$45

Keeping a vehicles engine clean actually will help it to run cooler, makes it easier to service and increases resale value. Engine compartment is shampooed with special degreasers & cleaners to break down caked up grease and grime that has deposited on firewalls, liquid containers and valve covers. Engine compartment is then "dressed" with a non silicone low sheen dressing. Although many precautions are taken not to damage electronic sensors we are not responsible for damage that could occur.

Ozone Treatment

\$50/4hrs

For strong offensive odors from cigarettes, smoke damage, decaying matter, pets, urine, food, beverages, vomit, mold and mildew our Ozone treatment permanently kills the odor. Ozone (O₃) is a colorless gas with a distinct scent. It is a molecule made up of 3 atoms of oxygen. Ozone occurs quite readily in nature, at the beach, in the forest, or near waterfalls. Since Ozone is the second most powerful sterilant in existence, it can easily destroy bacteria, viruses, mold, mildew and odors in a 1/2 hour to 4 hours. Our Complete interior service is highly recommended prior to the ozone treatment.
