## The Power Behind Speed's

Speed's Performance Plus is a family-owned mobile custom bike shop, with a brick and mortar shop based in Rapid City, South Dakota.

Speed's suffered the loss of our founder, visionary and father, Wayne (Speed) Hanson in 2013. His sons, Jason and Jamie will carry on the legendary performance tradition with their team of mechanics. Speed's Performance Plus carries high performance, dyno proven parts and accessories as well a variety of uniquely engineered performance parts and services for customizing your bike or building the bike you've always wanted.

## 2 mobile dynos, 35 years of experience.

You'll find Speed's mobile dyno center at many major motorcycle rallies throughout the United States. Our state-of-the-art dyno center allows us to install performance parts, motor building and perform dyno tuning on the spot.

### Can't attend the major rallies?

We can arrange to work on your bike from our Minnesota, or South Dakota locations.

### Our traveling road show now has a home.

Visit our Main shop in Rapid City, SD. Schedule your appointment and come see us this year. 605-695-2272.

**For the power hungry rider.** Building horsepower is what we do best, we install most aftermarket products such as blowers, heads, carb kits, fuel injection kits, and exhaust products, on location. Your bike then goes into the dyno to ensure the bike's maximum performance.

For more information on products and services, feel free to contact us or visit our newly customized mobile dyno center at one of our upcoming events. **See our website for our complete schedules of rallies and events.**

**Wayne "Speed" Hanson 1950-2013**

# SAVE THE TREES

## SPP OIL FILTER

### Features and Benefits:

The SPP reusable oil filter is the last oil filter you will need to buy! Say good bye to paper filters and the mess associated with standard filters. Simply clean and reuse!

- Up to 7 times more oil flow than paper filters
- Reduces bypass operation
- Reduces oil pump drag for potential HP gains
- Filters made of surgical stainless steel mesh
- Oil cooling fins keep oil temps low
- Will last the life of the bike with proper cleaning
- Triple magnets lock down internal debris
- 25 microns
- Easy install, open end allows for quick removal/install, all you need is a 1/2" extension and a ratchet
- Inspect, clean, reuse!

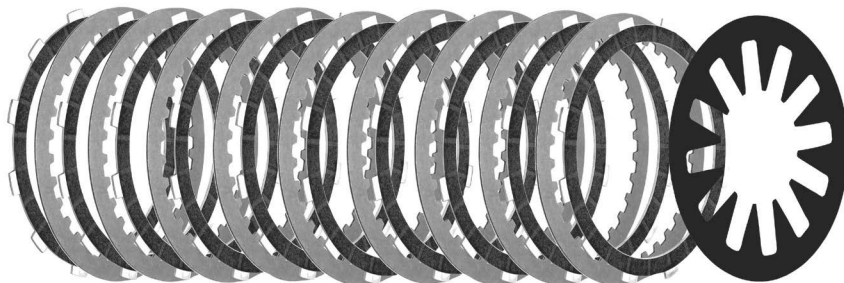

## SPP HIGH PERFORMANCE CLUTCH KIT

The SPP Extra Plate High Performance Clutch Kit Includes:

- 10 friction plates with race proven friction material on 6061T6 aluminum cores
- Diaphragm spring (many manufactures do not include)
- 9 tempered steel drive plates and a 10% stronger than stock diaphragm spring.
- Pre-measured stack height for easy, accurate installation.

**Perfect for hot street or strokers! Gives you 11% more surface area than stock.**

All parts are made in U.S.A

**Wayne "Speed" Hanson 1950-2013**

# MORE AIR = MORE HP!

## SPEEDY FLOW

This new air cleaner is masterfully engineered with internal breathing and machined from billet aluminum and set screws to ensure a firm hold.

### Features and Benefits:

The Speedy Flow has a larger, 2" high flow filter that out performs any stage I or stage II kit on the market. The Speedy Flow fits with the stock oval outer cover. That's value added quality from the company that's rewritten the book on performance. Speed's.

*The Speedy Flow will fit any Evolution [1993-1999] with a cv or Mikuni carburetor, any Twin Cam motor [1999 AND UP] with a Delphi fuel injection unit*

*Speedy Flow shown here with Speed's custom cover and Speed's crank vents*

### MORE AIR = MORE HP!

One of the many advancements that make the Speedy Flow a great addition to any motor is the increase in height. A full 2" taller than stock OEM filters, the Speedy Flow high flow filter brings more air into the motor providing a range of 8-12HP over stock filters!

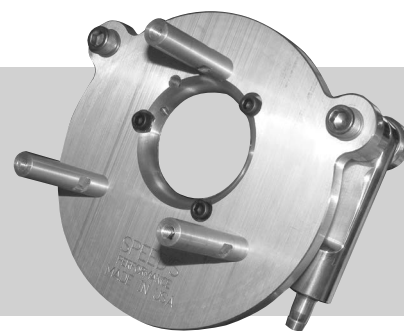

Among other added benefits the Speedy Flow will fit with stock oval outer covers. Fits any Evolution [1984-1999] with a cv or Mikuni carburetor, any twin cam motor [1999 and up] with a Dellphi fuel injection unit

**Available in High Gloss Black**

### New and Improved!

Speed's has moved the studs further out to create more airflow, stability and more horsepower. This also created a shorter stud that makes the air cleaner unit even more stable than before.

Horsepower Never Lies.

# SPEEDY MAX AIR CLEANER

## SPEEDY MAX AIR CLEANER

Fits Twin Cam motor, from 2008 -2016 FLH with FBW Delphi fuel injection only. Dyno-proven to add 8-12 horsepower over stock with proper fuel adjustments. Two-piece billet aluminum backing plate/carb support and cover with internal breathing system. Filter is 1/2" deeper than factory SE filter; better flow than any stage I or II kits on the market. Stainless Steel cap on filter to create that 3D mirror look. Contrast cut with black anodizing. Moving the studs from in front of the venturie creates more air flow and horsepower. 5 stand offs on the outside make the air cleaner unit more stable. Eliminates need for banjo fittings, hoses and breather filter. Setscrews keep the breather bolts from backing out over time. Made in the U.S.A. Washable, cleanable filter

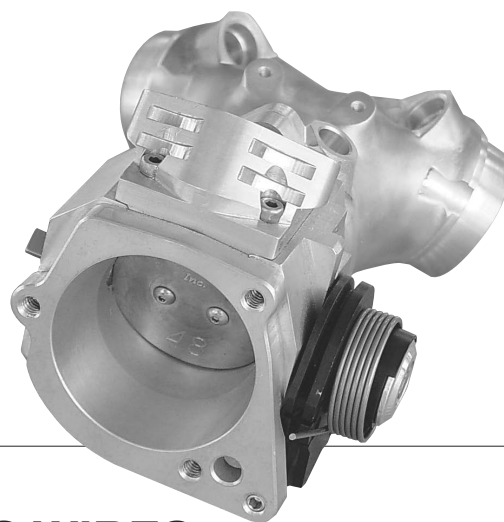

# MORE AIR = MORE HP!

## BIG BORE THROTTLE BODIES

SPP "Big Bore Throttle Bodies" are 100% compatible with OEM components so there's not a disappointing pile of parts left over when the upgrade is complete.

Our throttle bodies are available in a variety of sizes to complete any stage upgrade. Sizes include 48mm, 51mm, and 55mm

Matched intake manifold and throttle body available in: Satin Finish [shown], Mirror Finish or Black Wrinkle

### SPEED'S CUSTOM DERBY COVER

### SPEED'S CUSTOM BREATHER COVER

*Speedy Flow air cleaner and also available in plain chrome.  
Fits in front of existing cover.*

## PLUG WIRES

The ultimate in spark plug wire technology. This 40 Ohm wire with Kevlar® core and nickel copper alloy conductor can generate a solid 2-8hp.

# MOTOR KITS

## SPP 97" and 106" Motor Kits

The idea behind the S&S 97" big bore kits for 1999-'06 big twins and the 106" big bore kits for 2007 and up big twins, is there is no need to bore or split the cases. You just need to do the cylinder and piston swap. They look great because the cylinders are available with the same silver or black wrinkle powder-

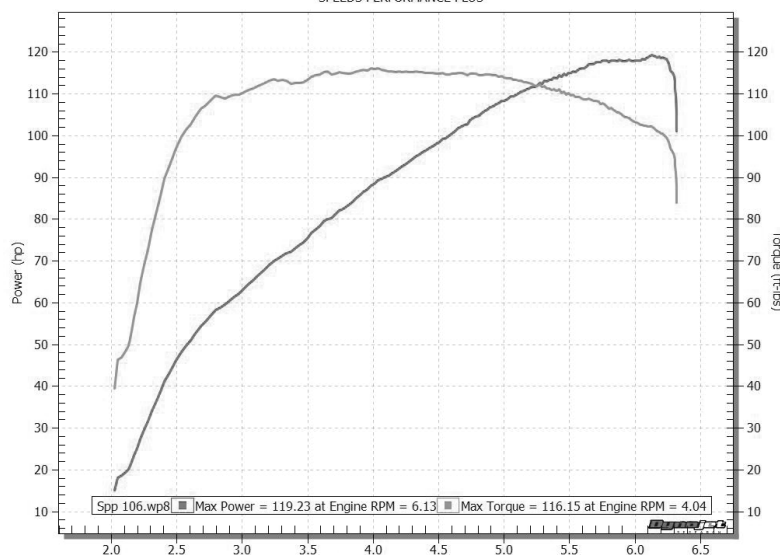

coat as stock, so they match the stock finish of your engine. These big bore kits yield excellent results with stock heads, and a set of performance cams is recommended to get the good results. To make the engine easier to turn over at start up, we use the S&S easy start cams with built in compression releases. For the best results adding a set of S&S super stock heads and a bigger throttle body will increase the performance even more. Below is a dyno graph of one of these motors. Let SPP build you one of these mild or wild rockets today, right here on location!

# MORE AIR = MORE HP!

## MOTOR KITS

### STAGE 1

The SPP Stage 1 kit is a quick and economical way to get more performance out of your V-twin.

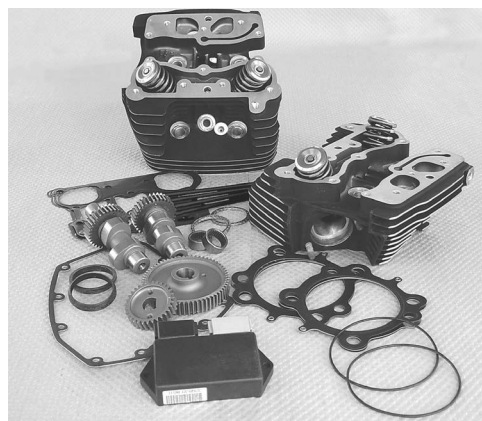

*Kit includes: Power Commander Ignition, Cam[s], Adjustable Push rods and Fuel Curve Map.*

### STAGE 2

Heads up! SPP Stage 2 kit is our most popular! A perfect combination of performance and affordability that's literally heads above other stage 2's on the market. Milled and ported to ensure absolute performance, one crack of the throttle and everyone knows you're a Speed's Performance Plus student.

*Kit includes: Heads, Power Commander Ignition, Cam[s], Adjustable Push rods and Fuel Curve Map*

### STAGE 3

Our two headed monster! This motor package is where budget is second to performance. When summoned, this beast will create plenty of horsepower and torque. Break away from the pack and don't look back, let that V-Twin run!

*Kit Includes: Power Commander Ignition, Cam[s], Adjustable Push rods, Heads, Barrels, Pistons+Rings, \*Fuel Curve Map or Dyno Pull*

*\*Motors receiving stage 3 kits require 500 miles road test before fuel curve or dyno test is performed.*

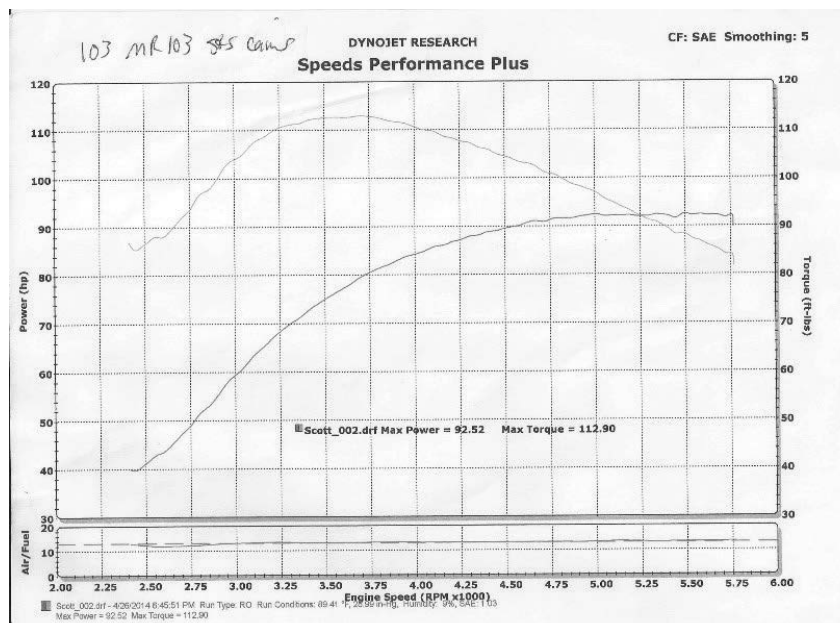

**Make it your own! Take your 96" to a 103" or give it some real attitude and take it to 124"! Make it mild or wild—it's your ride !**

# CAM KITS

## S&S MR103

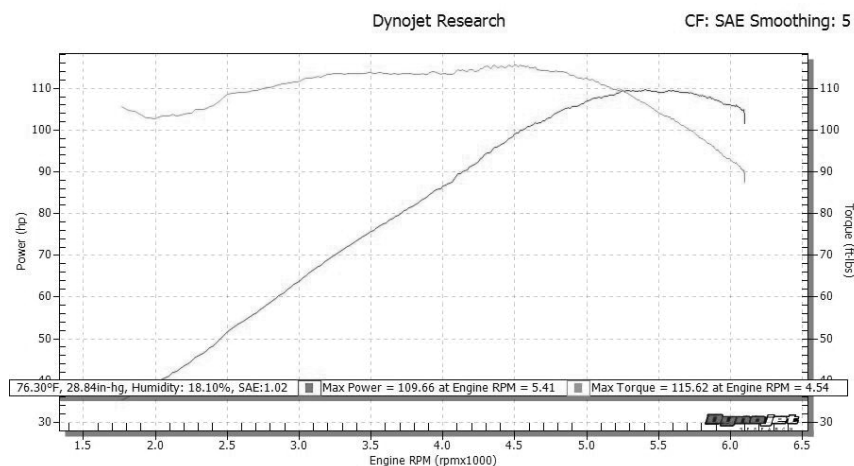

SPP does cam jobs right at the events. We can take your bike and in about 5 hours add 10-25 more ponies to your bike. Check out 2 of our most common kits.

2007 and up 103 cam kit using S&S MR103 gear drive east start cams. Stock a 103 does about 67 hp and 88 tq. After SPP added the cams and tuned the bike it produced 92.52hp and 112.90. A gain of about 25 hp and 25 tq.

## S&S 475

M8 2017 and up cam kit using an S&S 475 cam. Stock a 107" does about 78 hp and 96 tq. After SPP added the cam and tuned the bike it produced 109.66 hp and 115.62 tq. A gain of 31hp and 19 tq.

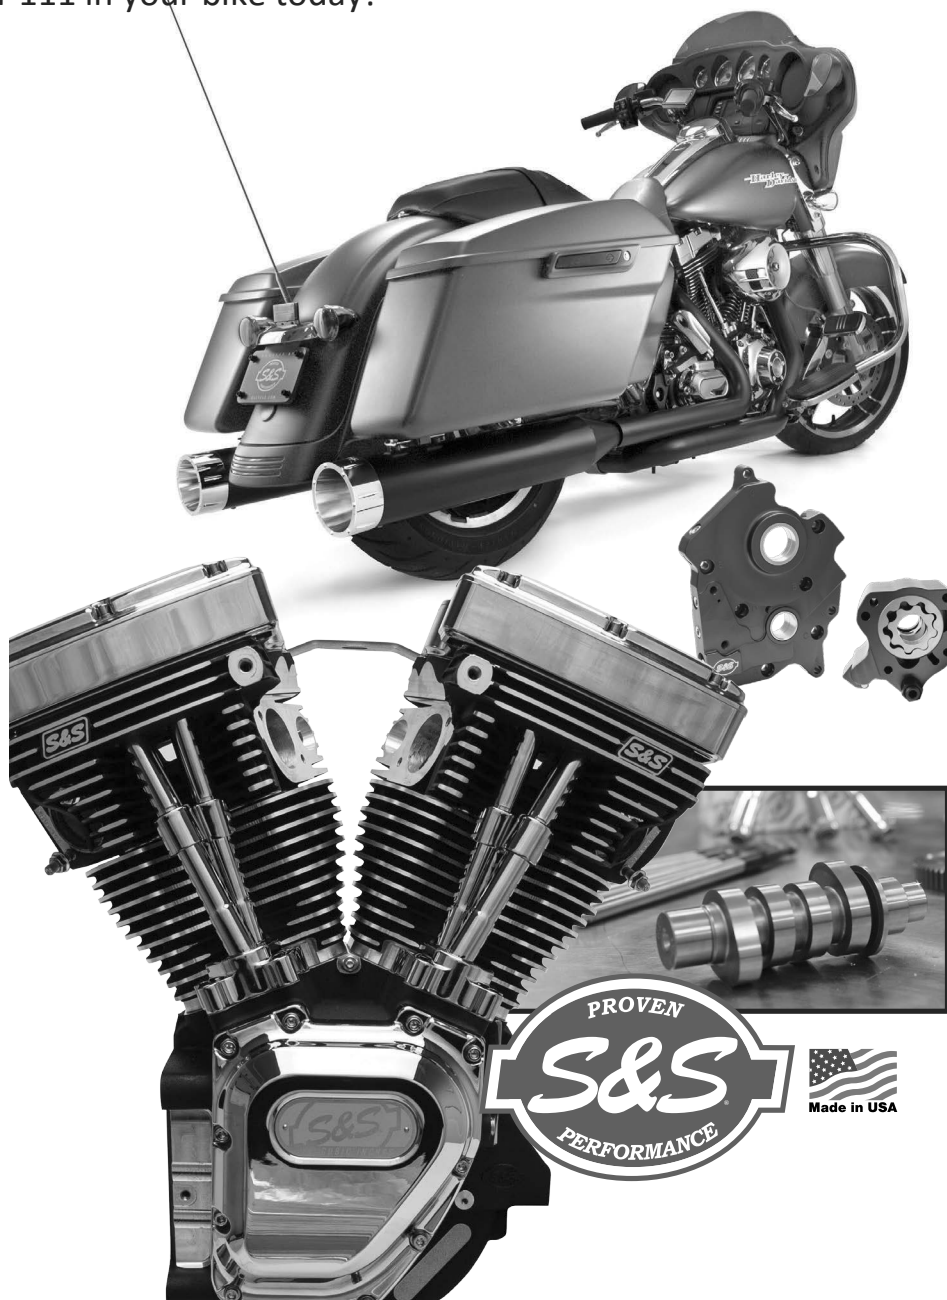

2017 Road Glide, M8 107 engine, S&S 475 cam, Jackpot 2/1/2 head pipe, S&S MK45 mufflers, SE air cleaner, dyno tuned with Dynojet Power Vision

# INSTALL AN S&S MOTOR TODAY!

## 130 Horsepower and 135 Torque

Speeds Performance Plus and S&S Cycles teamed up to now be able to offer a complete motor swap at the events Speed's will be attending! If you are interested in one of these T long blocks talk to one of the guys at S&S Cycle or Speeds Performance Plus today! We can install a 124 (as shown in the picture below) or 111 in your bike today!

# V-TWIN

301390150 / 96915

## V-TWIN SYNTHETIC ENGINE OIL

API SN, Certified JASO MA2

- Synthetic Ester with Extreme Pressure (anti-wear) additives
- Delivers ultimate protection and horsepower
- Superior transmission and wet clutch performance
- For air-cooled / liquid-cooled 4T engines with wet clutches
- Longest change intervals

301828150 / 96900

## BIG TWIN TRANSMISSION OIL

API GL-5

- Formulated for motorcycles with separate transmissions and/or final drives
- Substitute for Hypoid Gear Oil 85W-140
- Quiets gear whine and improves shifting
- Distinctive red color for easy leak detection

301830150 / 96920

## V-TWIN PRIMARY CHAINCASE LUBRICANT

- Formulated for primary chains and wet clutches
- Substitute for Gear Oil 80W
- Prevents clutch slipping and chatter for consistent engagement
- Distinctive red color for easy leak detection

## ***V-TWIN & CRUISER MOTORCYCLES***

Head Gaskets / Base Gaskets / Engine Only Kits / Rocker box / Primary / Transmission

Cometic offers a full line of V-Twin and Cruiser gaskets for models from 1936 through current day. Whether you have a stock bike or a fire breathing all out race machine, Cometic has you covered. Need just one gasket, not the entire kit? No problem, Cometic offers individual gaskets. Cometic also offers custom gaskets at shelf stock prices.

Cometic uses its EST "Extreme Sealing Technology" philosophy while making every gasket. All gaskets and seals have been proven through state-of-the-art research and development processes and validated on the street and the track. Multi-Layer Steel (MLS) head gaskets, Aluminum Foamette Material (AFM) primary gaskets and Stainless Steel rocker box gaskets are the mainstay of the Cometic V-Twin and Cruiser product lineup.
