PENNSYLVANIA DOT PREASSEMBLED SILT FENCE

PRODUCT FEATURES

- Preassembled with hardwood stakes attached for fast installation
- Packaged in bundles for easy transport and storage
- Polypropylene fabric is specially designed to allow water to filter through while retaining silt and other sediment on construction sites
- Protects streams, lakes and other waterways from silt build-up
- Keeps adjoining roadways free of mud and debris
- Available in 18" x 100', 30" x 100' and custom sizes

PRODUCT INSTALLATION

1. Dig a 6" wide by 6" deep trench where silt fence is to be installed.
2. Drive posts into the ground on the downside trench edge until the bottom of the 6" unattached flap touches the bottom of the trench. **Posts are to be on the downside of the fabric opposite the flow.**
3. Backfill the trench and tamp.
4. With correct installation, silt and sediment will not flow under the silt fence.
5. Install tie back stake when required for the 30" fence.
