

LX™-SB Spunbond Landscape Fabrics

Carthage Mills' LX-SB Spunbond Line of nonwoven landscape fabrics are polyester (PET) geotextiles. With their high strength to weight ratios, these landscape fabrics provide excellent dimensional stability. The polyester construction of this line is non-biodegradable, is rot and mildew resistant and offer excellent ultra-violet resistance insuring its long life in your project. The Carthage Mills LX-SB Line of spunbond nonwoven landscape fabrics provides excellent separation while allowing for the passage of air, water and fertilizer. These fabrics are ideal to use as a weed block, an underlayment for patio and paver applications, and as a drainage filter fabric.
