STUDENT ATTENDANCE

Efficient Management of Student Attendance

TotalCard's attendance tracking module allows campuses to seamlessly integrate with their Student Information System and track student attendance, helping teachers to enforce attendance policies that would otherwise be extremely difficult to manage in large classes. Attendance data is reported back to the Student Information System in real-time.

"Many of my class sizes have hundreds of students enrolled and keeping up with attendance is nearly impossible. TotalCard's Attendance Tracking system allows me to see student names in Banner as they check-in to class and run reports on who wasn't present."

University Professor

Key Features & Benefits:

- Streamlined student check-in process
- Customizable check-in times
- Electronic reporting for class attendance
- Enforcement of attendance policies in classes
- Real-time integration with Student Information System

Additional TotalCard Modules:

- Photo ID
- Laundry
