A BadgePass Company

VENDING

Vending Transactions with Student IDs

If you are looking to increase student convenience by integrating vending services into your campus card program, TotalCard Vending can help. By implementing TotalCard for on-campus vending, you can eliminate coin collection and increase electronic reporting capabilities.

"We have dozens of vending machines around campus. Previously, students had to keep cash on them in order to purchase anything, but now they can simply swipe their student ID and the amount is deducted from their balance. It makes everyone's life a lot easier."

Director of Student Services
