# ISG™ AutoCam Model Z100 Zoom Camera

ISG™ AutoCam Model Z100 Zoom Camera System

Quality, speed and consistent cropping and centering are very important aspects of a photo ID system — and result in improved visual security. Captured images must be of high quality for the database and printed card. Fast image capture from various distances, with the subject standing or sitting, is key. Captured images that are too far away from the person, too close to the person, or off-centered can compromise not only your photo ID card system but also your security program.

The integrated flash means you do not need to purchase a separate flash. The flash provides consistent and quality lighting, even in a completely dark room.

ISG™ AutoCam Model Z100 Zoom Cameras are designed to provide the very best quality, consistency and speed. ISG exclusive cameras can be supported for the long term, unlike consumer cameras that require continual replacement.

Delivers high resolution image capture with full zoom control

ISG™ AutoCam Model Z100 Zoom Camera Features

- Full optical zoom control from mouse or keyboard
- Powerful high intensity flash for perfect captures 18 inches to 14 feet from subject
