

WHY VISION?

BUILT TO LAST

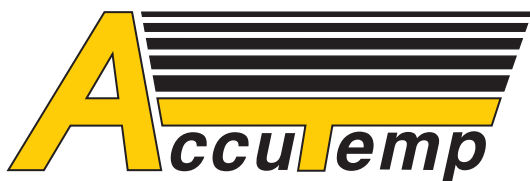

304 Stainless Steel exterior and interior cavity. Only stainless steel used in the construction of our ovens, except for the glass on the door. No plastic parts to melt or break.

A CLEAN, EASY TO ACCESS SERVICE COMPARTMENT

Makes repairs easier for either a service agent, or a resident maintenance technician.

AUTOMATIC CLEANING SYSTEM

Easy to use automatic cleaning system that will take the hard work out of cleaning your combi steamer at the end of the day.

WORLD'S BEST
VISION
TOUCH
COMBI STEAMER

BOILERLESS STEAM INJECTION SYSTEM

Our system maximizes energy and water efficiency. Vision combi steamers use our extremely efficient steam injection system and reversing air dispersal fan, thus saving you time and money compared to messy boiler based combi ovens.

EASY TO OPERATE

User friendly control panel that feels intuitive to operate. No mechanical knobs or dials to break off. The Vision Touch combi steamer features a responsive touch screen that is easier to use than your smartphone.

MULTI-TIMER FEATURE

Allows the user to set up multiple menu items in advance for continuous batch cooking.

USB PORTS AND LAN CONNECTIONS

Standard on all Vision Touch combi steamers, this allows users to upload or download their own recipes, photos, or menu items. Users can also download HACCP data for archiving on a separate computer.

TWO STEP SAFETY DOOR HANDLE

All of our Vision models come standard with a two step safety handle to help prevent accidental burns from steam when opening the door.

AUTOMATIC COOL-DOWN

Initiated whenever a cleaning cycle is started. Other ovens require the operator to open the door and cool down manually.

TRIPLE-PANE, COOL TO THE TOUCH, CURVED GLASS DOOR

The Vision combi steamer doors are all made with three separate layers of glass for the best insulation possible. The curved glass exterior is non-reflective so that you can see inside from anywhere in the kitchen.
