

General Instructions for Take It Off Concrete Sealer Remover

1. Read and understand [safety data sheet](#) (SDS) before using this product.
2. Cover any areas that could absorb liquids, such as sheetrock, woodwork, or drains.
3. Apply Take-It-Off manually or with garden sprayer to small areas.
4. Take up material as quickly as possible to prevent excessive penetration into the substrate.
5. Allow as much time as necessary to let Take-It-Off penetrate and soften the coating/sealer.
6. A variety of methods may be used to take up the liquefied coating/sealer, such as an Auto Scrubber or squeegee.
7. Clean up liquefied material and dispose of properly.
8. Aggressively clean surface with water and detergent (slab cleaner) before polishing, grinding, staining or applying mastics or adhesives.
