## **ROTO POLYMERS ATTENDS “K 2016” TRADE SHOW IN GERMANY**

---

Cleveland, OH – November 22, 2016 – Established rotomolding natural resin supplier and color compound manufacturing company, Roto Polymers, announces their attendance at K 2016.

While at K 2016, Roto Polymers met with current and potential customers in the rotational molding industry.

“As always, we enjoyed being part of this great event. We love having the opportunity to showcase our expertise in natural rotomolding resins and color compounds,” says a Roto Polymers spokesperson. “We’d like to thank our current customers for visiting our booth, and we look forward to doing business with all the new contacts we made.”

Roto Polymers is an innovative leader in the rotomolding industry. Since 1997, Roto Polymers has positioned itself as a top supplier of high quality natural resins and manufacturer of color compounds in pellet and powder form. In fact, Roto Polymers is one of the largest natural rotomolding resin suppliers and color compound manufacturers in North America, supported by an infrastructure that supplies a volume of over 200 million pounds per year in over 30 countries. Roto Polymers’ rotomolding resins are produced into five distinct polymer products: ROTOLENE , ROTOLENE HIGH FLOW , ROTOLENE INDUSTRIAL , ROTOLENE HD and ROTOLENE BLACK ULTRA .

Each one of these products is uniquely formulated to have specific properties and characteristics that fit a host of industrial and commercial end applications, including industrial, agricultural, chemical and water tanks; large cisterns, trash containers, bulk containers and marine parts; outdoor chairs, kayaks, coolers and hot tubs; and outdoor playhouses, slides and swing sets.

Roto Polymers has created global industry partnerships by making their rotomolding resins accessible. They do this by offering their products at internationally competitive prices with volume discounts and products on consignment, so customers have options when purchasing.
