Maintenance Coordinator Jan 2019

Icy Waters Ltd. is an aquaculture company dedicated to the development, growth, processing, and sale of premium Arctic Charr and “Yukon Gold” Arctic Charr ova. The 25 + year old Canadian company believes that all employees be directly involved in production from “egg to plate”.

We are seeking a person to fill the position of a full time permanent, hands-on Maintenance Coordinator. This self-starter will have strong technical, organization and communication skills and will work closely with the General Manager, and VP of Aquaculture.

As the Maintenance Coordinator, you will be responsible for all maintenance needs of our facility including production, processing and office areas.

Highlighted Responsibilities:

- Provide routine daily maintenance to all areas of the facility
- Develop and maintain an effective preventive maintenance schedule
- Identify potential risks and hazards and provide solutions
- Collaborate with staff and management for input and support
- Communicate effectively with service providers, external contractors and inspectors
- Order parts and equipment for projects and general maintenance
- Maintain and manage tools and equipment
- Record and report on daily maintenance activity
- Participate in Health and Safety meetings and support a safe work environment
