

## News Release

### S4 Worldwide Introduces Live Streaming Body Camera

**DOYLESTOWN, PA & LAS VEGAS, NV – JANUARY 4, 2017 – LVCC, CENTRAL HALL BOOTH 13517 (VOXX Advanced Solutions Corp)** – S4 Worldwide announced today the introduction of ACCU.C 4G, a streaming 4G body camera optimized for the Verizon network and designed to provide clear, accurate video and audio footage. The ACCU.C 4G body camera has been co-developed in partnership by S4W and [VOXX Advanced Solutions Corporation \(VASC\)](#), a wholly-owned subsidiary of [VOXX International Corporation](#) (NASDAQ: VOXX), a worldwide leader in many automotive and consumer electronics and accessories categories, as well as premium high-end audio. The AudioVOX/S4W branded ACCU.C 4G provides law enforcement and other security services organizations with a streaming wearable body camera with limitless use cases far beyond the capabilities of standard body cameras available today. The ACCU.C 4G device will be available late Spring 2017.

Designed for the specific needs of law enforcement officers, the ACCU.C 4G body camera integrates streaming communication into a rugged, portable and reliable design, which is sure to surpass all expectations with a perfect combination of form and function. Recording in full high-definition video with a super-wide viewing angle up to 120-degrees and built-in GPS for real-time location tagged videos, the ACCU.C 4G body camera provides users with the ability to stream and/or record events as they happen. This device also provides certified users with a real-time assessment of ongoing events as they are happening and can live stream footage to nearby connected devices with text alert notifications.

“The introduction of ACCU.C 4G provides an advancement in the body camera market that is unprecedented to law enforcement and other security organizations by providing streaming capabilities beyond what is available from traditional body camera manufacturers today. The AudioVOX/S4W ACCU.C 4G rounds out S4W’s existing live streaming security and surveillance platforms through our partnership with VOXX Advanced Solutions Corporation and Verizon, greatly expanding our manufacturing and distribution channels for this emerging market” said Paul Soult, President and CEO of S4 Worldwide. “With the inclusion of the ACCU.C 4G, law enforcement will now have improved response times due to an increased level of visibility in streaming of real-time situations, greatly enhancing the level of safety for the public and police officers.”

Additionally, this camera features a 2.0” digital LCD screen for instant playback and review, offers the ability to set pre/post event recording, captures still-photos during video recording and enables audio memo recording. The ACCU.C 4G body camera is extremely versatile in any situation with up to a 10-hour battery life, waterproof housing, infrared night vision, and multiple mounting options and accessories.

The ACCU.C 4G body camera provides a complete and secure end-to-end solution with a smooth transfer from event capture to file upload always preserving the complete integrity of a secure chain of custody for all audio and video content. The ACCU.C 4G body camera will automatically upload content captured via Wi-Fi, LTE and/or direct download when placed into charging stations so footage is never handled by human hands.

An integral piece of making the ACCU.C 4G body camera a complete end-to-end solution is BlueWitness evidence preservation data management software, providing remote archiving capabilities to store, search and review captured footage. The BlueWitness dashboard gives certified users the ability to observe live situations to appropriately respond in real-time. BlueWitness is CJIS compliant and provides users with customized data retention profiles to control data storage with end to end encryption and digital finger printing to ensure tamper proof evidence.

AudioVOX/S4W will be introducing a line of innovative body cameras under the ACCU.C name. The introduction of **ACCU.C 4G** is the premium camera under this new product line with **ACCU.C Wi-Fi** and **ACCU.C 360** launching in the coming months.
