

**The AccuTemp Accu-Steam griddle;
unmatched speed, efficiency and
durability!**

Steam, by nature, is attracted to anything colder than itself. So, when a cold or frozen product is placed on the griddle surface, the steam in the chamber is attracted to that portion of the griddle, causing near-instant surface temperature recovery regardless of the food load. The steam heat also provides a surface that boasts the smallest surface temperature variance in the industry, less than 5 degrees anywhere on the griddle surface! No cold spots here!

What does an even temperature surface and near instant recovery mean to you, a more consistent product and decreased ticket times during peak business periods.

With benefits like these it's no wonder why the largest chain restaurants and the U.S. Military rely on the AccuTemp Accu-Steam griddle!

Options Galore!

The AccuTemp Accu-Steam griddles are fully customizable with our available accessories and options, including; condiment boards, griddle holding plates, stands and more!
