

Mobile Solutions® App

Manage larger areas of an event with greater flexibility and security.

Managing a large amount of information using a small device.

Using the Mobile Solutions® App from a smartphone, tablet, or handheld device allows users to manage personnel, visitors, volunteers and assets away from the Command Center at any location. Users can securely access data on personnel including contact & medical information, skill sets, and personal assets using the **Mobile Solutions® App**.

Create an event and enroll personnel from one of these mobile devices before the Command Center is even setup onsite. Personnel are able to manage larger areas of a location and monitor event status while moving in and out of the vicinity of the Command Center. They can manage individuals, equipment, and activity using an interactive menu full of event management functions, within the **Mobile Solutions® App**.

  Compatible with Android™ & iOS operating systems.

Personnel Data

Search for a user & access contact & medical info, skills & personal asset data.

Event Status

Monitor Personnel Assignments to see when they checked in, how long they've been active & if they are approaching or have met their time limit.

Manage Incidents

Create new incidents, divisions, & assignments. Manage multiple incidents.

Check Personnel In/Out

Scan IDs or manually check in/out an individual or a group of personnel into an Incident, division, & assignment.

On-site Assets

View which assets are being used, when they were checked in, and how long they've been active.

Maximized Connectivity

The Mobile Solutions® App connects wirelessly to the Mobile Solutions® Data Server, which is hosted either locally at the Command Center or on an Internet Cloud. Mobile devices connect via WiFi, Cellular, Local WiFi, or a Network. If a connection is lost or cannot be established, data collected & managed by the Mobile Solutions® App is stored directly on the mobile device. Data can be synchronized once a connection is made.

Enterprise Grade Device

The XT1 handheld device provides a more ruggedized mobile device to partner with the Mobile Solutions® App. It's features provide a higher level of quality for a solution that meets enterprise & government requirements including IP54 standards.

*Mobile Solutions App Features

- > Track people & assets away from the command workstation.
- > Create an event & enroll people on-site before the command workstation is setup.
- > Synchronize data to/from your handheld by transmitting data in real-time or store data until connectivity is available.
- > Multiple devices work from one centralized database.
- > Cloud hosted centralized database.
- > Affordable, flexible solution.
- > Manage multiple incidents at once.
- > Download data to the mobile device.
- > Manage multiple entry & exit checkpoints on-site.
- > Supports many formats including 1 & 2D barcodes, QR tags, etc.
