

Emergency Event Manager

A mobile solution designed to quickly and securely provide positive ID on-site and track activity of emergency first responders and volunteers at an emergency scene.

The Emergency Event Manager Solution (EEMS) is a software program designed for first responders to automate the process of identifying and managing personnel at emergency scenes quickly and securely. EEMS provides first responders improved security, greater risk management and more accountability during an event.

Emergency Event Manager can be integrated with companion products to provide a full featured system for day to day and emergency event use. Elliott's Mobile Solutions allow you the flexibility to design your solution to meet the specific needs of your department with the option to add on to your solution at any time. When integrated with companion products, EEMS allows you to:

- Quickly transport your command center on-site and setup within minutes.
- Track personnel and assets away from the command workstation.
- Know what personnel and attainable assets are available.
- Share information on a local, regional, state or national level across all departments.
- Wirelessly transmit data in real time.
- Back up data with a one click process.
- Accurately identify people and assets.
- Track products by grant, department and purchase date.

EEMS Features

- > Instantly issue positive ID on-site.
- > Positively ID all volunteers, rescue crews and first responders in a disaster area.
- > Track & manage personnel and volunteer data.
- > An interoperable system allowing other credentials to be integrated at an event.
- > Tells you who's on-site and who's not on-site.
- > Integrates with FIPS 201.
- > An affordable solution for departments large and small.
- > Integration of PIV solutions.
- > Generate accurate reports quickly for federal reimbursement.
- > Choose from multiple card designs and print IDs.
- > Efficiently search for attainable assets or skilled professionals.

Positive Identification

1. EEMS provides both a stand alone or networkable solution that can quickly capture a driver's license or state issued ID, then populate a database.
2. A secure ID is produced on a high quality plastic card.
3. Credentials are presented for checking in/out at any entrance/exit. Emergency Event Manager allows you to scan a card and immediately track who is onsite, their purpose, location, and time spent onsite.

Companion Products

The Emergency Event Manager software can be integrated with other hardware and software products to enhance the solution and build a more comprehensive system resulting in greater effectiveness and success.

Mobile Command Cases

The Mobile Command Case is a turn-key, integrated solution packaged as a compact, self contained workstation. This case is designed to quickly be transported and setup with little to no preparation.

- Available as a standard or mini command case.
- Protected by a durable, water tight mobile case.
- Track people away from the command workstation.

Easily transport to multiple locations with little to no preparation!

Data Server

- Remotely synchronize your Command Center with the Data Server.
- Doubles as a backup for data recovery.
- Synchronize and share data with many Command Centers.
- Tailor options of access to other Command Centers.

Mobile Solutions App

- Track personnel away from the command workstation.
- Create an event & enroll people on-site before the command workstation is setup.
- Manage multiple entry and exit points at a site.
- Multiple devices work from one centralized database.
- Supports many formats including 1&2D barcodes, QR tags, etc.

Elliott Clinic Manager

- Enroll patients on-site.
- Dispense medication and supplies.
- Provide a dynamic medical questionnaire.
- Produce Face Sheets with barcode.
- Prevent patients from receiving duplicate medication.
- Track patients throughout an event by scanning a barcode on their Face Sheet, wristband or credentials.

Asset Manager Solution

- Tracks products by grant, department & purchase date.
- Track information on items that require maintenance.
- Generate asset reports for accountability of state and federal grant purchases.
- Associate assets using a parent/child category relationship.
- Use a handheld device for quick & easy inventory tracking.
- Assign assets to people.

ID Badging System

- Multiple security features available.
- Increased durability with virtual edge-to-edge laminates.
- Instantly issue quality IDs.
- Include color photos, logos & background images on IDs.
- Theft-deterrent software and hardware lock system.

IDPix 1000 Professional

- One click photo capture & auto cropping.
- Quickly capture high quality photos.
- Cable management.
- Ability to integrate with multiple cameras & software.
- Reliable, consistent performance.
- Streamlined design & function controls.

Additional Features

- > Assign responders and assets to groups.
- > Auto notification of assignment duration limit.
- > Auto notification of expired IDs or certifications.
- > Send mass messages via e-mail to a group of responders with the ability to schedule reoccurring messages and attach a report.
- > Read 1- and 2-D barcodes, RFID chips, Smart Cards and MOCA cards.
- > Run reports, manage personnel and assets while viewing data in either real time or while offline.
