The General Ledger module ties together all aspects of Titan II for a complete financial picture of your business. Accounts receivable, accounts payable, inventory receipts and production processing are all tightly integrated with the General Ledger to give you a clear view of the past. Our “Active Budgeting” feature will give you a clear view of the future.

With the ability to create unlimited budgeting scenarios, the “Active Budgeting” feature enables you to create budgets based on current and projected sales figures. “Percent of Actual Sales budgeting” as well as “Fixed budgeting” give you the tools to create truly flexible and realistic budgets.

Combining ease of use with power and flexibility, Titan’s General Ledger module will provide you with valuable business insight to lead you to the next level.
