Titan II was built with scores of features to enable the Precaster to successfully manage inventory while improving customer service.

Inventory turnover can be dramatically improved by Titan's simplified processes specifically designed for the Precaster. Dispatch and production processing, bill of materials management, and purchase order processing are all tightly integrated giving everyone accurate, timely information.

Customer service can be greatly enhanced by the many customer and job inquiry screens available in Titan II.

Inventory profitability can be tightly monitored using the many analytical reports available in Titan II.

By sharing vital, accurate information throughout the office, Titan II gives precasters the ability to meet customers' expectations, effectively manage production resources and retain company capital.
