Titan enables the production scheduler and dispatcher to act as a cohesive unit.

By sharing information through Titan, both production and dispatch personnel are given the tools to achieve efficiencies that would otherwise be unobtainable using a manual system.

Through the use of many features created specifically for the dispatcher, the balance of client expectations and production resources can be managed more effectively.

With complete job information at everyone's fingertips, the continuous task of answering customer inquires can be distributed throughout the office, while, the actual time of dispatching products and managing trucks and drivers will be considerably reduced.
