

Two resources to keep children dry at night, clean all the time

The **TRY for DRY Web site** (right) highlights the TRY for DRY program based at Children's Memorial Hospital in Chicago, established to address the problem of nocturnal enuresis in children. To that end, the TRY for DRY staff developed a treatment kit that gathers materials from several sources, to guide patients to successfully stay dry at night. For information about the TRY for DRY program, visit www.tryfordry.com.

Soiling Solutions

END ENCOPRESIS AND ABOLISH BEDWETTING NOW!

Special Note: Schools, Parent Groups, Medical Sites/Groups, and Family Agencies: please take note of our planned tour in late February through to mid-April for possible "group" presentations on the origins and estimates for the Soiling Solutions' protocols toward the bottom of this page. etc.

Talk Possibilities on Tour/Trip:

Sharon and I will be dropping down thru Michigan beginning on Feb 25 (Fri) to the Atlanta, GA area on Feb 25. We will be in Atlanta all day on the 26th and 27th (Mon & Tue). I would be available to address an audience or group anyone may be able to arrange. Traveling on I would be available for a talk or meeting in Houston/San Antonio on Friday March 2. On March 7 we arrive in Tucson and I would be available for a talk (possibly only one day through to March 10, given a 180 mile roller around Tucson. On the way back to Michigan I would consider talks for April 7-8, Sat, Sun, or Mon in the Topeka-Wander City area. This will be very much a pleasure mixed with business (vacation trip plus a news 8V camera). Please call to 888-217-9153 or email bolpdy@yahoo.com if you are interested in a formal or very casual meeting. I check for voice made daily. Don't be shy. Sharon and I love meeting professionals and parents. And, yes, if nothing works out we will be retaining our enjoying ourselves.

I will address groups on a per day basis at other times of the year. See contact information for email, regular mail, or phone at the bottom of any web page on this site.

TRY for DRY

Welcome to Try for Dry

The TRY for DRY is the only evidence-based, research-based program available, and has been helping families achieve success for more than 20 years. Because our approach addresses the root causes of wetting, Try for Dry is effective for children, teens and adults.

We know you're probably frustrated with the wetting and load of being told to wait for your child to outgrow it. You're here to offer families the [TRY for DRY](http://www.tryfordry.com) to stop the wetting right now, and you can do it on your own or in cooperation with your regular doctor.

You can learn how Try for Dry works or get started on the path to a dry night now with the Try for Dry kit.

Here on the Try for Dry site you can also visit the **Expert Resource Center** to learn about the root causes of wetting and how to manage it. Check out our other landing in the States and use the [TRY for DRY](http://www.tryfordry.com) to learn more about our program towards dryness.

At Try for Dry, we provide care for children who wet.

Visit the Health Resource Center to learn about treatment options and more about our other services.

Visit the Physician Resource Center to learn more about the TRY for DRY kit.

The **Soiling Solutions Web site** (left) was designed to help children who have encopresis. It features the *Clean Kid Manual*, developed by behavioral psychologist Robert Collins, PhD. The 10-chapter manual discusses the causes and effects of soiling, sets out the "Clean Kid" approach, troubleshoots problems in keeping clean, and offers advice to parents on how to help their children stay clean. Cost: \$50. For information, visit www.soilingsolutions.com or call (888) 217-9153.
