

COVID19 Emergency Management

In response to the global threat of Covid-19, Myriddian has partnered with AG Witt to provide comprehensive disaster preparedness, mitigation, response, recovery and emergency management advisory services to public and private sector organizations.

COVID-19 PREPARATION

On January 30, 2020, the International Health Regulations Emergency Committee of the World Health Organization declared the outbreak a “public health emergency of international concern” (PHEIC). **On March 11, 2020, the World Health Organization declared the outbreak a Pandemic as confirmed cases of COVID-19 had spread to more than 100 countries.**

In order to respond to COVID-19 and other current or emerging global and national events we have created a team to bring a holistic approach to disaster management. Each team member specializes in a specific niche that is broken out by the four stages of disaster recovery: Mitigation, Preparedness, Response and Recovery. Our team and subject matter experts have the capabilities to provide a comprehensive approach to effectively utilize, manage and deploy resources with the goal of preparing our clients for rapid containment, recovery, and communications.

PAST PERFORMANCE & CAPABILITIES

We build lasting partnerships with our clients because we continually perform for them. We advise state and local governments, hospitals and health systems, institutions of higher education and K-12, water utilities and power districts, as well as the private sector as they seek solutions to the myriad of issues presented by disasters. We are there with our clients to help them turn such obstacles that arise into opportunities for strengthening communities.

BUSINESS CERTIFICATIONS

SBA 8(a) | WOSB | DBE | NSA-DHMH | SBE-MDOT | NMSDC

 866-917-4467

Core Capabilities
