is a simple and safe technique. It involves implanting micro pigments into the second layer of the skin, creating a soft subtle shadow of color on the skin.

<b>Full Eyeliner</b>	<b>\$400</b>	<b>Full Lip Liner</b>	<b>\$400</b>
<b>Upper Eyeliner</b>	<b>\$250</b>	<b>Full Lips</b>	<b>\$500</b>

<b>Full Eyebrows</b>	<b>\$400</b>	<b>Touch Up</b>	<b>\$100</b>

#### Microblading **\$500**

Microblading (or eyebrow embroidery) is a relatively new method and incredibly popular treatment to fill in and shape the brows. Pigment is implanted in the basal membrane, which divides the epidermis from the dermis layer of the skin (Upper dermis). This technique is therefore more superficial than tattooing, leaving crisp and natural looking hair strokes. Pigments during microblading are not implanted as deep into the skin as a traditional tattoo, or even micropigmentation with an electric permanent makeup device. This allows for healed results of very fine, thin, and crisp hair lines. A touch-up may be required and will be discussed during your consultation.
