Perforated Wall & Canopy Panel System

# ZIP-RIB®

## Perforated Wall & Canopy Panel System

**ZIP-RIB Perforated** Wall and Canopy Panels are intended to create an aesthetically pleasing yet functional metal cladding solution. Available in a variety of perforation patterns, materials, and colors, designers can create an architecturally attractive yet cost efficient building façade.

### Benefits:

- Sunshade to reduce interior heat
- Controls light while allowing air movement
- Easy to install and cost effective
- Lightweight, structural, and wind resistant
- Protection from vandalism and harsh weather
- Installed Vertical, Horizontal or Diagonal
- Concave/Convex curvatures
- Variety of patterns, materials and colors of your choice
- Engineered sub-framing components and shop drawings
- Maintenance free

### Applications:

- New or retrofit construction
- Wind break barriers
- Equipment screens
- Pre-cast concrete structures
- Parking garages
- Stair towers
- Canopies

### Materials:

Aluminum: .040" or .050"    Stainless Steel: 22 ga or 20 ga

### Finishes:

Fluoropolymer PVDF coil coatings – unlimited colors  
Coil anodized aluminum – unlimited colors and hues  
Natural, Textured, Weathered, or Pigmented colors

**Coverages:** 12" or 16" standard

Perforation Patterns in the flat of the panel:

- |                 |                               |
|-----------------|-------------------------------|
| 40% open area   | 1/8" dia. x 3/16" staggered   |
| 41% open area   | 1/16" holes x 3/32" staggered |
| 32.6% open area | 3/16" dia. x 5/16" staggered  |

Other material, finishes, coverages and patterns available subject to inquiry.
