

MedProx™ Mobile

Medication distribution is a vital but complicated process in most hospitals. Efficiency, safety, and accountability must all be balanced to provide a process that supports both best practices and patient satisfaction. MedProx Mobile provides a unique and advanced solution allowing hospitals to accomplish their goals without compromising nursing efficiency or patient safety.

Unique Features

- Increase time for direct patient care by reducing trips from the med cart or automated dispensing.
- Supports best practices for bedside medication administration.
- Flexible platform provides options from basic to fully integrated.
- Integration with any HIS platform for a truly accountable solution.
- Pharmacy robot compatible.
- On-Screen label functionality.
- Optional individual locking bins provide the highest level of patient safety.
- Optional side open design does not interfere with keyboard tray.
- Advanced support for Microsoft Active Directory integration.
- Simple design allows for easy service.
- Control access via password, ID Card, or Biometric.

Patient ID Module

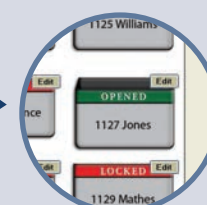

The MedProx Patient ID Module increases patient safety by automating the process of unlocking each individual medication drawer by requiring the user to scan the patient's ID band.

1. Barcode Scan:

Scan Patient ID

2. MedProx Software:

Unlock Drawer

3. MedProx Cabinet:

Open Drawer

Easy Login

Promote accountability by easily logging into the MedProx system with the scan of the user's ID badge or through Microsoft Active Directory.

Integration of Hardware & Software

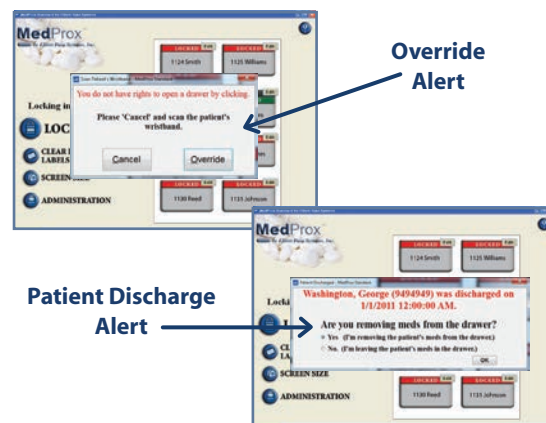

The MedProx Mobile Systems consists of a MedProx medication dispensing cabinet managed by one of our three versions of MedProx software integrated with a mobile workstation. This combination allows healthcare organizations to achieve the right balance of efficiency, safety, and accountability to enhance critical clinical systems such as bedside documentation and bedside medication administration.

MedProx Software Functionality Matrix	Keypad	Lite	Standard	Patient ID
Control MedProx Mobile Cabinets	X	X	X	X
Supports Single Bin Access Options		X	X	X
Offers On-Screen GUI		X	X	X
Scan Badge to Log-In (Optional)			X	X
HL7 Interfaces (HIS/ADT)				X
Centrally manage users, groups, depts., etc.			X	X
Centrally pull audit reports			X	X
Centrally manage cabinet parameters			X	X
Integration with MS Active Directory (optional)			X	X
Access Database (local only)		X		
SQL Database			X	X
Basic Reporting		X		
User Specific Reporting			X	X
Nursing Trend Reporting				
Client Only		X		X
Client /Server			X	X
Assign Patient (up to 2) to drawer & force barcode scan open				X
Manually label patient drawers on-screen		X	X	
Discharge/Transfer reminders				X

MedProx Alerts

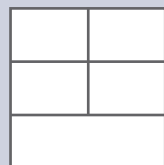

MedProx software provides added safety measures by notifying users of important alerts that may contribute to the patients' safety and overall management of medication.

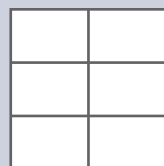

MedProx Configuration Options

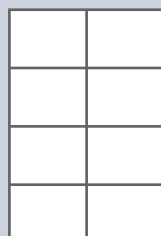

Side Open
