

■ Simplified Data Capture

Reduce the time it takes to enroll people into any system with BadgePass SmartReg. Simply scan a driver's license or federally issued ID and watch as the system automatically populates any enrollment or registration screen in seconds. Save both time and money by minimizing manual data entry errors and reducing the time it takes to enter customer information. With SmartReg, duplicate records and misspellings can quickly become a thing of the past.

BadgePass™
Smarter. Faster. Better.

Automate Enrollment

The process is simple. Scan a driver's license or federally issued ID and SmartReg will automatically populate your current enrollment or registration screen. The system is specifically designed to work with your current system, adding an increased level of functionality and cost-effectiveness.

Assure Accuracy

Manually typing customer and member information into a system is not only time consuming, but it can often lead to costly errors and misspellings. By collecting the information directly from your patrons' IDs you can guarantee accurate information every time and help to make duplicate records a thing of the past.

Expedite Check-In

The more efficient your enrollment process is, the happier your customers will be. Help them to enjoy your products and services faster and increase the likelihood that they will return in the future.

Features:		Other BadgePass Products:
