

### **Pinguicula Care and Planting Instructions**

- 1. When planting with other carnivorous plants, dig a small hole the size of a quarter and fill it with "pinguicula mix" making a mound.**
- 2. Take the pinguicula, turning it over exposing the underside with the roots, take some pinguicula mix making a paste and gently apply it to the exposed roots.**
- 3. Turn the pinguicula over gently placing it on the mound of pinguicula mix and gently compress it in the planter.**
- 4. Water over the leaves with filtered/bottled/distilled water.**
- 5. The soil should remain moist at all times and 2-4 hours of filtered light daily. You can feed them monthly using a 20-20-20 fertilizer mist the top of the pinguicula.**
