EXCEL-ERATING GREEN BUILDING IN BROOKLYN

Brooklyn, NY August 27, 2008 – Furthering its commitment to environmentally responsible and energy efficient building practices, Brooklyn based Excel Builders & Renovators Inc. became a member of the US Green Building Council this week.

The USGBC is a national, non-profit organization committed to transforming the way buildings and communities are designed, built and operated, enabling an environmentally and socially responsible, healthy and prosperous environment.

“We looked at several green organizations before we decided to become members of the USGBC,” according to Excel president Matthew Goldfine. “They are the industry benchmark. We have had a long standing commitment to environmentally conscious building practices and the USGBC’s vision and commitment most closely reflects our own”

The USGBC provides top quality education on green building practices, including a professional accreditation program that certifies individuals who have demonstrated a thorough understanding of the principles of the Leadership in Energy and Environmental Design (LEED) rating system. The LEED rating system is a third party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings. It gives building owners and operators the tools they need to have an immediate and measureable impact on their building’s green performance.

“We have begun the process of education and implementing the LEED practices and tools offered,” Goldfine added. “These issues have always been very important to us and this is just one more way to fulfill that commitment.”

About Excel Builders

Excel Builders & Renovators Inc. is a Brooklyn based custom builder and boutique developer bringing modern and traditional elegance, environmentally sound practices and the highest quality materials and construction methods to urban living. Since 1997 Excel has been creating total living environments that both aesthetically and ergonomically anticipate the homeowner’s needs. An obsessive attention to detail in both what you can and cannot see makes Excel’s work a thing of lasting beauty.
