There's a line between a good shingle and a great shingle®

It's the nailing line on your shingles. The difference between a good shingle and a great shingle is having Patented SureNail® Technology. With SureNail® strip, strength and durability are built into every Duration® Series shingle. This unique shingle design provides outstanding gripping power.

Excellent Adhesive Power

Helps keep the shingle layers laminated.

Outstanding Grip

Our enhanced Tru-Bond®** sealant grips tightly to the engineered fabric nailing strip on the shingle below.

Breakthrough Design

Patented SureNail® Technology is the first and only reinforced nailing zone on the face of the shingle.

"No Guess" Wide Nailing Zone

This tough, engineered woven-fabric strip is embedded in the shingle to create an easy-to-see, strong, durable fastener zone.

Triple Layer Protection®+

A unique "triple layer" of reinforcement occurs when the fabric overlays the common bond of the shingle laminate layers that offers excellent fastener holding power.

Double the Common Bond

SureNail® Technology features up to a 200% wider common bond area in the nailing zone over standard shingles.
