

HELP YOUR PET WITH LASER THERAPY

Laser Therapy Plan

Laser therapy can be part of the solution to help ease your pet's pain. Safe and effective, this powerful treatment may help your furry friend to heal more quickly, regain normal movement faster, and avoid infections that might delay their road to recovery.

With our state-of-the-art class IV K-Laser, dogs and cats now have a whole new avenue for recovery and healing, including:

- Pain relief
- Improvement of arthritic joints
- Spinal cord pain relief
- Wound healing
- Circulatory problems
- Skin disease
- Post-operative healing
- Acute injuries

How Does It Work?

Light energy enters damaged cells and stimulates inter-cellular activity. This activity reduces pain in the area and accelerates cellular recovery. Once the cells recover, the process is complete.

What Can I Expect During Treatment?

Laser therapy is painless and quick, usually lasting just 10 minutes. Your pet may experience a warm sensation at the point of application.

What Can I Expect After Treatment?

Patients with chronic conditions can be helped with regular treatments. Although improvement often appears after the first visit, most patients require several treatments (3-8 sessions) for the most significant benefit.

For most conditions, we recommend a multi-visit treatment plan. Treatments vary in length, but most sites require 2-8 minutes of treatment. A majority of patients experience greater comfort and improved mobility within 12-24 hours of treatment.

PAIN-FREE LASER PLAN 1

Monthly Payment: \$59.00

One-Time Enrollment Fee: \$35.00

- 1 Pain Area

- 2 Full Laser Treatments Per Month

- 2 Office Visits

- 2 Brief Health Checks
