

Samantha Caballero

Director, Requirements & Capabilities

Samantha Caballero is a Director of Requirements and Capabilities within Raytheon's Advanced Products & Solutions Business Unit at RTX Corporation. She leads strategic customer engagement and new business initiatives across Raytheon's Space Imaging and Microelectronics product line.

An accomplished aerospace and defense business development leader with more than 17 years of experience across the national security, civil, and commercial space markets, she previously held leadership roles at Maxar Space Systems, General Dynamics Mission Systems and Raytheon, developing growth strategies, leading major competitive captures, and building strong, trusted relationships across U.S. Government and industry partners.

Throughout her career, she has focused on connecting customer mission needs with innovative technical solutions and bringing together cross-functional teams to pursue and secure strategic opportunities.

She holds a Bachelor of Arts in Political Science from the University of California, Davis.
