

David Zoller

Senior Director, KORD
Directed Energy and Missile Technology
Prototyping and Products

David Zoller is a senior aerospace and defense executive with more than 20 years of experience leading advanced technology, engineering, manufacturing, and program management organizations across the defense, space, and aerospace sectors. As Senior Director at KORD, he leads strategic, technical, and operational efforts supporting directed energy, high-energy laser, and missile technology programs critical to national security.

Prior to joining KORD, David served as Director of Program Management for Space Superiority at KBR, where he led advanced space defense initiatives. He also spent more than 15 years with TMC Design, holding leadership positions in engineering, manufacturing, and program management while overseeing AS9100-certified operations and the delivery of aerospace and defense systems.

Earlier in his career, David held multiple leadership roles with General Motors, where he drove manufacturing excellence, process improvement, and workforce development initiatives.

A graduate of New Mexico State University, David is recognized for building high-performing teams, transitioning emerging technologies into operational capabilities, and delivering innovative solutions to complex defense challenges.
