Gloves - Sterile Gloves - Non-Sterile	

Our Supply Chain

Our network of suppliers are located throughout China, but the majority are based in Beijing, Shanghai, Guangdong, and Zhejiang province. Our factory network is currently producing massive quantities of medical goods and shipping them throughout the world every day.

Please see a breakdown of how your order would be processed, manufactured, inspected and shipped out below.

1.

After a thorough vetting process, verifying all certificates and site inspecting the facilities, our network of factories can produce up to 2.5 million KN95 and 3.5 million 3PLY

2.

After a successful verification process, the designated verified factory (or multiple) will start producing the order. The current lead time is three to five days for 3PLY and five to seven days for KN95.

GENTOX

MEDICAL SERVICES

3.

When the production is finalized, the Medical Services certified QC agency will visit the premises to perform quality control and report back to our sourcing director with the results.

4.

Upon a passed QC inspection the goods are loaded onto planes by our freight forwarders in airports around China. Whereafter they arrive in the US/EU and are cleared through customs.

5.

Upon arrival and customs clearance, the goods will be delivered. Sales take place in the US/EU and will be delivered to the local address of your desire.

About Shipping

Since the current manufacturing and export environment is unpredictable, for large and urgent orders we have access to private cargo planes for hire at your desire, **please note this requires a custom quote**. IF you are interested in shipping by sea, which will take two weeks to a month, please get in touch with us ASAP for a quote.

To Keep in Mind

Please bear in mind that all variable information such as pricing, quantities, and delivery times are subject to change, as the situation we are in is volatile.

If you have any questions after reading this document, please get in touch with our CEO ukennedy@gentoxmedicalsolutions.com.
